

VCUG/ Voiding Cystourethrogram

Description

A pediatric voiding cystourethrogram (VCUG) is an X-ray examination of a child's bladder and lower urinary tract that uses a special form of x-ray called fluoroscopy and a contrast material.

What does the equipment look like?

Examples of the Table, Fluoroscopic Image Intensifier, and Overhead X-ray Tube.

Reasons for having an VCUG

A voiding cystourethrogram enables a radiologist, a physician specifically trained to supervise and interpret radiology examinations, to detect abnormalities in the flow of urine through the urinary tract.

How do I prepare for a VCUG?

There are no special instructions to prep for this exam.
